

Mobile Diversion

UK Divert has always been a pioneer and innovator in the field of international call diversion services. A UK Virtual Mobile number gives you a UK number that will divert UK calls for free to an international mobile in 151 countries.

Your UK Divert Virtual Mobile Number begins with the numbers 07, similar to the code used for standard UK mobile phones. Callers to your number pay 35p per minute, similar to the charge of calling a regular UK mobile number. However, calls are then diverted from the UK to your international mobile phone at no cost to you.

The advantages of using a UK Divert virtual mobile number are:

- You can give your UK number to colleagues and customers in the UK and have them call you on your mobile phone for approximately the same cost as they would pay to call a normal UK mobile phone.
- You can use a UK number to receive calls abroad on a mobile phone without having to pay roaming charges
- You can change your mobile number diversion if you travel and wish to use a different international mobile phone when you move between countries
- Calls are diverted from the UK to your mobile phone for free

A UK Divert Virtual Mobile Number costs £7.95 a month and comes with our unique service satisfaction guarantee.
